

MetricConversion Error Logs -

Only one error, loop continued to run (switch statement) moving on to the next choice

```
Enter your choice - 4  
Input the number of miles - 300  
300 miles equals 480.0 kilometres  
Input the number of centimetres -
```

Fixed it by adding a break statement at the end

```
switch (userChoice) {  
    case 1: inchToCm(); break;  
    case 2: feetToCm(); break;  
    case 3: yardToM(); break;  
    case 4: mileToKm(); break;  
    case 5: cmToInch(); break;  
    case 6: cmToFeet(); break;  
    case 7: mToYard(); break;  
    case 8: kmToMile(); break;  
}
```
